PROJECTS AND EXPERIENCE

Course Instructor

MIT App Inventor and Scratch Game Development

📅 June 2023

📍 At Intellect School by THF

As an MIT App Inventor instructor, I enjoy the challenge of simplifying complex coding concepts into manageable steps, empowering students of all ages to create innovative apps without prior programming experience. Through teaching Scratch, I foster a collaborative learning environment where students share ideas, solve problems, and create interactive experiences, sparking their passion for coding and computer science.

All-In-One Tailoring Website

Contributor in Final Year Project

📅 August 2022 – 2023

Link: <https://github.com/mshehryrahmed/Darzii>

A Tailoring website using MERN stack, where tailors provide their tailoring services to clients and receive their orders for both tailoring and selling of cloth and other tailoring accessories. The website is prepared using **React.js & Material UI components**

The Hunar Foundation (THF) Website

Link: <https://github.com/mubeen25/THF-React>

📅 Replicating THF Website, Extending it with a Student Portal

The Hunar Foundation website, extending the website's functionality with enhanced student portal system, that enables students to enroll in the academy and track their performance live.

Notebook Website

MERN stack & Bootstrap project (Personal Project)

📅 May 2023

Developed a Notebook site on **MERN stack** using the functional components. Added authentication with **jwt** and **express-validator** for password securing. The front end used commonly used react hooks like **useEffect**, **useContext**, **useState** etc. Used bootstrap components to structure the website.
